Frontend Engineer specializing in accessible, performant web apps built with React, Svelte, and Tailwind. Design background (Product Designer / UI Engineer, UI/UX degree) enables an end-to-end wireframe-to-production workflow, with direct ownership of identity and security-critical interfaces.

Core Skills

- React, React Native, Svelte, JavaScript, TypeScript
- Tailwind, Figma, Vite, Rollup, Accessibility (WCAG, axe-core)
- Playwright, Cypress, CI/CD, Docker, AWS
- Backend / Node.js: Fastify, DynamoDB (NoSQL)

Work Experience

Hello Identity Co-op, *Founding Engineer*

Feb 2021 – Present

- Achieved a 95% Lighthouse accessibility score by architecting responsive UI systems from scratch using React and Svelte, ensuring WCAG 2.1 compliance for 100K+ users.
- Optimized web performance, reducing initial page load time by 40% through the implementation of route-based code-splitting, lazy loading, and automated asset compression pipelines.
- Developed robust test suites (unit, integration, E2E) and conducted accessibility audits (axe-core, Microsoft FastPass), integrating results into CI/CD pipelines aligned with ISO 9001 and SOC 2 standards, reducing production UI defects by 30%.
- Engineered OAuth 2.0 and JWT-based authentication flows, implementing world-class security standards under the mentorship of Dick Hardt (OAuth 2.0 & JWT lead).
- Owned frontend architecture end-to-end and contributed to backend bug fixes and database migration tasks (Node/Fastify, DynamoDB), supporting a product used by 100K+ monthly active users.

Kaarva, *Product Designer / UI Engineer*

May 2019 – Feb 2021

- Led the design of a salary advance app for 100K+ monthly active customers, reporting directly to founders and securing backing from investors like JP Morgan, Dell Foundation, and Gates Foundation.
- Accelerated frontend development speed by 30% through the architecture of a company-wide React component library and design system (React class components, Sketch), used by fintech transaction dashboards serving 100K+ customers.

Projects

a day in my life

Daily mood tracking React Native iOS app — #1 Top Selling App, Health & Fitness category, Apple App Store. Built with React Native, React Navigation, AsyncStorage, Lottie animations, push notifications, and biometric auth.

.savegame

A video game tracker that utilizes the IGDB API, recommends games based on play style, and maintains a persistent database, complete with UI/unit tests.

Pangolier

Architected Pangolier, a declarative Web UI testing framework using Playwright and JavaScript, reducing boilerplate test code by 50% for complex E2E user flows.

Education

Manipal University, Manipal, India, *Bachelor of Science – Major in UI/UX*

Apr 2017 – Jun 2020
